Miscellaneous: Yes
Comments:

The proposed amendment to add new Rule 32.1 is long overdue and should be adopted. Unpublished decisions which cannot be referred are an anachronism in this age of computers and electronic databases which should be put to final rest.

Your requirement for an address for public inspection are OK, but your alternative of an e-mail address in a public inspection file is dumb. You are just promoting spam. If you have to publish addresses, require mailing addresses, not electronic addresses. One should be guarding their electronic address, not putting it in a public inspection database.
